I am an experienced software engineer with a passion for developing innovative programs that accelerate the efficiency and effectiveness of organizational success. I am curious about technology and writing code to create reliable and user friendly systems and I am happy as I improve myself . I am a curious, innovative thinker who is confident to develop customized software to meet a company's corporate needs, highlight core competencies and advance their success.

PROFESSIONAL EXPERIENCE

Contiune April 2021 — **Integration Operations Software Developer, Vodafone, Turkey**

- Develop solutions to solve integration problems with the support of the development team
- E2E Service Monitoring and development
- Quality Control of systems performance
- Release deployment execution and integrated planning and automations project and design.
- Continual Service Software Monitoring and Development (Appdynamics, Smarttrace) and Improvement
- Knowledge Java Spring Framework and Hibernate
- Knowledge Oracle PL/SQL
- Knowledge Unix/Linux based System
- Experienced Bash scripts and Python automation scripts

Integration Developer | Oracle | Java | Web Service | Microservice | Spring Boot | Spring | Jenkins | Hibernate

April 2021 – December 2019 — **Devops Engineer, Vodafone, Turkey**

- Creating and managing CI/CD processes with Bamboo for in-house developed applications, preparing build, test and deployment scripts, automating processes.
- Installing the services that the applications depend on (HAProxy, Keepalived, Nginx, Apache, Mysql, PostgreSQL, Redis, RabbitMQ, Elasticsearch, Redash, Sentry) to be High Available, making management, maintenance and performance improvements, solving the problems encountered, keeping the servers and services up-to-date.
- Collection and processing of server and application logs in Graylog, visualization on dashboards and creation of necessary alert mechanisms.
- Ensuring uninterrupted operation of the servers and services of the applications and products under my responsibility, 7/24. Monitoring, troubleshooting and performance improvements
- Dockerize applications, prepare for Kubernetes migration, write Helm Charts for deployment. Automating deployments in Rancher Kubernetes environment with ArgoCD.
- Managing and updating applications used in the company such as Jira, Bitbucket, Confluence, Bamboo, Sentry, Graylog, Zabbix.
- Monitoring servers and applications with Zabbix. Taking actions for incoming alarms. Develop custom monitoring scripts for different needs and generating alerts.

Jira | Zabbix | Maximo | RabbitMQ | Elasticsearch | Apache Tomcat | Appdynamics | Smarttrace | Java | Jenkins | Docker

August 2019 – July 2018 — **Software Intern and Software Developer(Part Time), Viensco, Turkey**

- Using the Modbus protocol in Python, PLC Devices can be controlled according to humidity and temperature values from the sensor.
- Knowledge .NET, MSSQL
- Knowledge Windows based System
- Knowledge with JIRA follows the project's solution.

Python | MSSQL | .Net | Windows | Jira | Modbus

August 2017 – July 2017 — **Software Intern, Atos, Turkey**

- Knowledge Java, Spring Framework and Hibernate
- Knowledge Oracle PL/SQL
- Knowledge Unix/Linux based System

Java | Spring | Hibernate | Linux | Oracle | Sql

German ●●○○○

PROFESSIONAL ORGANIZATIONS

- Bilgisayar Mühendisleri Odası - BMO (No : 6654)
- Linux Kullanıcıları Derneği

EDUCATION

2019 Ankara Atılım University, BS in Computer Engineering GPA:2.71
2013 İzmir Gazeteci Çetin Altan Anatolian Technical High School, Database Programming

CERTIFICATES

Courseara	AWS Fundamentals : Building Serverless Applications, IBM Data Science, IBM Data Analyst, IBM Machine Learning
Udemy	Deep Learning A-Z™| Python ile Derin Öğrenme, Oracle WebLogic 12c for Administrators, Spring and Hibernate for Beginners
Udacity	AI Programming with Python,Intro to Machine Learning with TensorFlow
Elginkan	Java,C++, Android Mobile Programming
Linux Özgür Yaz Kampı 2019	Django ile Web Programlama

PROJECTS

HUB HUMAN RESOURCE — 2021

github.com/emrebalikci/HumanHub
A system like Linkedin is developed with Spring Boot and React Native

Spring | Java | React | Eclipse

NEBULA — 2019 - 2020

github.com/emrebalikci/NeBuLaa
An online shopping application with Spring Boot and Hibernate where customers buy items.

Spring | Java | Hibernate | Eclipse

DEEP LEARNING BASED REAL TIME BUILDING ANALYSIS SYSTEM — 2018 - 2019

License Research Project
The aim of this project is to analyze the condition of the building during the earthquake and also to make estimations about the number of people in the building after the earthquake.Then,to provide the integration of the security cameras to the application in order to count the people entering and exiting the building.

Python | Java | Spring | RasperryPi | Tensorflow | AWS

ONLINEQ — 2017

github.com/emrebalikci/OnLineQ
The aim of the project is to measure users' knowledge in computer science and to enable them to learn new information. Then, time decreases and the degree of difficulty increases gradually. Users can actively play with each other.

Java | JavaFx

AIR RADAR SIMULATOR (ARS) — 2016

github.com/emrebalikci/ARS
A game-like JavaFX application which randomly creates aircrafts and makes users shoot them.

Java | JavaFx
